

CURRICULUM VITAE

Dimitrios J. Stravopodis, *M.Sc., Ph.D.*

Assistant Professor

Department of Cell Biology and Biophysics,
Faculty of Biology, University of Athens, Athens, Greece (GR)

Athens, Greece, 2010

Date of birth: 28 – 01 – 1966.
Nationality: Greek.
Home address: Terpsichoris 90, 17562, Paleo Faliro, Athens, Greece.
Telephone at home: ++30 210 988 5141, ++30 697 220 7795 (*mobile*).
E-mail address: dstravop@biol.uoa.gr (<http://www-biol.uoa.gr>).
Marital status: Married (*no children*).
Martial status: Completed (*12 months of military obligations*).
Scientific specialty: Cellular & Molecular Biology (CMB), M.Sc. – Ph.D. Holder.
Professional occupation: Assistant Professor (Tenured), Biology of the Cell & Development.
Work address: Department of Cell Biology & Biophysics (2nd Floor, Office No.: 35), Faculty of Biology, University of Athens, Panepistimiopolis, 15784 Zografou, Athens, Greece (GR).
Telephone at work: ++30 210 727 4105.
Fax at work: ++30 210 727 4742.
Foreign languages: English (*fluently*).
Computer knowledge: MS-Office: Word, Excel, Power/point, Internet Explorer.

-
- ➔ **1977 – 1983:** 1^o – 4^o High school of New Smyrni, Athens, Greece (*Excellent*).
 - ➔ **1983 – 1989:** *B.Sc.:* Department of Biology, Athens, Greece (*Excellent*).
 - ➔ **1989 – 1991:** *M.Sc.:* Institute of Molecular Biology and Biotecnology (IMBB – FORTH) & Department of Biology, Heraklion, Crete, Greece (*Excellent*).
 - ➔ **1991 – 1995:** *Ph.D.:* Institute of Molecular Biology and Biotecnology (IMBB – FORTH) & Department of Biology, Heraklion, Crete, Greece (*Excellent*).
 - ➔ **1995:** Xanthopoulou-Pneumatikou Honoured Award (*Pan-Hellenic*).
 - ➔ **1995 – 1998:** *Post-Doctoral Research:* St. Jude Children’s Research Hospital (SJCRH), Department of Biochemistry, Memphis, Tennessee, USA.
 - ➔ **1997 – 1998:** *Post-Doctoral Fellowship:* Howard Hughes Medical Institute (HHMI), Chevy Chase, Maryland, USA (*Worldwide*).
 - ➔ **1998 – 1999:** Military Obligations at the Greek Army.
 - ➔ **1999 – 2000:** *Post-Doctoral Research:* National Center for Scientific Research (NCSR) “Demokritos”, Institute of Biology (IB), Athens, Greece.
 - ➔ **2000 – 2001:** *Post-Doctoral Research:* University of Athens, Faculty of Biology, Department of Cell Biology & Biophysics, Athens, Greece (*sponsored by IKY {State Scholarships Foundation}*).
 - ➔ **2000 – 2005:** *Technical Inspector of Occupational Health & Safety (OHS-Inspector).* Subspecialty: *Biochemistry*. Ministry of Occupation & Social Protection, Athens, Greece (2003 – 2005: *National Representative in EEC {EU}*).
 - ➔ **2006 – :** *Assistant Professor of Biology of the Cell & Development:* University of Athens, Faculty of Biology, Department of Cell Biology & Biophysics, Athens, Greece.
 - ➔ **2009:** Acquisition of *Tenure* as an *Assistant Professor of Biology of the Cell & Development:* University of Athens, Faculty of Biology, Department of Cell Biology & Biophysics, Athens, Greece.
-

- ➔ **1989 – 2010:** Author of **43** prototype *Scientific Articles* (published in high peer-reviewed *International Journals*), (Citation Index: > **2170**), (Total Impact Factor Value: **207.904**; Mean Impact Factor Value: **5.07**).
-
- ➔ **1994 – 1995:** Author of the *Ph.D. Thesis*.
- ➔ **2001 – 2004:** Author of the University Textbook: “*Biology of the Cell*”, 2004, *Medical Publications “Litsas”*, (CD & 3D-goggles included).
- ➔ **1999 – 2006:** *Teaching appointment* of special topics in *Cellular & Molecular Biology Courses*: Graduate program (“*Biological Applications in Medicine*”), Faculty of Biology, University of Athens, Athens, Greece.
- ➔ **2000 – 2006:** *Affiliated Professor* in the American College of Greece – *Deree College: Introduction to Biology II* (BI 1101 A1) and *Introduction to Molecular Biology* (BI 1002 A1; *Course Co-ordinator*).
- ➔ **2007:** *Contributor* in the *Translation* from the English to Greek Language of the Scientific Textbook: “*Medical Genetics at a Glance*”, 2003, 1st Edition, Blackwell Science, *Scientific Publications “Parisianou”*, (Pritchard DJ & Korf BR).
-

Publications

(*High-Peer Review International Journals*)

Original Articles: 1989 – 2010

- (1). K. E. Keramaris, **D. J. Stravopodis** and L. H. Margaritis, (1991). A structural protein that plays an enzymatic role in the eggshell of *Drosophila melanogaster*. *Cell Biology International (Reports)*, February, Vol. 15, No. 2, pg. 151 – 159.
- (2). S. Vassiliadis, **D. J. Stravopodis**, N. Kyrpides, M. Grigoriou and J. Papamatheakis, (1993). One and two – level regulation patterns affecting NF- κ B mRNA and nuclear NF- κ B activity after treatment with TNF- α , IFN- γ and IL-4. *European Cytokine Network (ECN)*, January – February, Vol. 4, No. 1, pg. 25 – 30.
- (3). S. Vassiliadis, N. Kyrpides, **D. J. Stravopodis**, M. Grigoriou, I. Athanassakis and J. Papamatheakis, (1993). Investigation of intracellular signals generated by γ -interferon and IL-4 leading to the induction of class – II antigen expression. *Mediators of Inflammation*, September, Vol. 2, No. 5, pg. 343 – 348.
- (4). D. Thanos, M. Gregoriou, **D. J. Stravopodis**, K. Liapaki, T. Makatounakis and J. Papamatheakis, (1993). The MHC class – II E β promoter: a complex arrangement of positive and negative elements determines B cell and interferon- γ (IFN- γ) regulated expression. *Nucleic Acids Research (NAR)*, December 25, Vol. 21, No. 25, pg. 6010 – 6019.
- (5). F. W. Quelle, D. Wang, T. Nosaka, W. Thierfelder, **D. J. Stravopodis**, Y. Weinstein and J. N. Ihle, (1996). Erythropoietin induces activation of Stat5 through association with specific tyrosines on the receptor that are not required for a mitogenic response. *Molecular and Cellular Biology (MCB)*, April, Vol. 16, No. 4, pg. 1622 – 1631.

- (6). D. Wang, **D. J. Stravopodis**, S. Teglund, J. Kitazawa and J. N. Ihle, (1996). Naturally occurring dominant negative variants of Stat5. *Molecular and Cellular Biology (MCB)*, November, Vol. 16, No. 11, pg. 6141 – 6148.
- (7). E. Parganas, D. Wang, **D. J. Stravopodis**, D. J. Topham, J. C. Marine, S. Teglund, E. F. Vanin, S. Bodner, O. R. Colamonici, J. M. van Deursen, G. Grosveld and J. N. Ihle, (1998). Jak2 is essential for signaling through a variety of cytokine receptors. *Cell*, May 1, Vol. 93, No. 3, pg. 385 – 395.
- (8)*. S. Teglund, C. McKay, E. Schuetz, J. M. van Deursen, **D. J. Stravopodis**, D. Wang, M. Brown, S. Bodner, G. Grosveld and J. N. Ihle, (1998). Stat5a and Stat5b proteins have essential and nonessential, or redundant, roles in cytokine responses. *Cell*, May 29, Vol. 93, No. 5, pg. 841 – 850. *[Hot Paper: The Scientist, 14 [20]: 16, October 16, 2000].
- (9). **D. J. Stravopodis** and N. C. Kyrpides, (1999). Identification of protein – tyrosine phosphatases in Archaea. *Journal of Molecular Evolution (JME)*, May, Vol. 48, No. 5, pg. 625 – 627.

Current Research Collaborations

- National Center for Scientific Research (NCSR) “**Demokritos**”, Institute of Biology (IB), Athens, Greece: Dr. Gerassimos Voutsinas (*B'-level Principal Investigator*).
- Academy of Athens – Foundation of BioMedical Research, Center of Basic Research, Athens, Greece:
 - Dr. Ema Anastasiadou (*D'-level Principal Investigator*),

- *Dr. George Tsangaris (A'-level Faculty Member),*
 - *Dr. Christos Zervas (C'-level Principal Investigator).*
-

Research Interests and Current Activities

- Unravelling the cellular mechanisms and signalling pathways that control the responses of human urinary bladder cancer cells, of distinct *p53* genetic background (i.e. “p53^{+/+}” or “p53^{-/-}”) and Akt functional status (i.e. “constitutive” or “inducible” activation), to the cytotoxic activities of conventional and targeting chemotherapeutic drugs. The former group contains Doxorubicin, Cisplatin, 5-Fluorouracil and Taxol, while the latter one includes 3-Bromopyruvate (glycolytic inhibitor), Bortezomib/Velcade (proteasome inhibitor) and Geldanamycin, together with its structural analogues 17-AAG and 17-DMAG (Hsp90 inhibitors). Having established a strong and fruitful collaboration with the research group of Dr. G.E. Voutsinas (Principal Investigator, Level B', Institute of Biology, NCSR “Demokritos”, Athens, Greece), our common central direction is the molecular elucidation and characterization of critical cell death programs, giving specific emphasis to “apoptosis”, “autophagy”, and “programmed necrosis”, and their related signalling networks, which determine not only the “poisonous” action of each drug, but, also, the presumable acquisition of resistance against the given drug or pharmaceutical regimen.
 - Illumination of the regulatory processes implicated in *Drosophila melanogaster* oogenesis, with special attention in the activation of programmed cell death (“apoptosis” and “autophagy”) of the nurse cell cluster during middle and late oogenesis of developing follicles. Using modern transgenic technology tools, such as the GAL4/UAS binary genetic system, and through the RNAi cellular pathway, a number of genes and their cognate protein products are either over-expressed or downregulated (via RNAi) in a tissue-specific fashion, revealing their functional importance, or redundant (or, alternatively, non-essential) role, in various organs and systems, such as the compound eye, the wing, the ovary and the nervous system of the fly.
 - Moreover, *Drosophila melanogaster* oogenesis has been currently utilized by our laboratory as a model biological system for the *in vivo* assessment of the “apoptotic” and “autophagic” potential of a number of stress-inducing factors, including, among others, the chemotherapeutic reagents Doxorubicin (topoisomerase-II inhibitor) and Bortezomib/Velcade (proteasome inhibitor), as well as the Ultraviolet (UV) radiation with wavelength characteristics of 254 nm (UVC) and 312 nm (UVB).
